Description of fiscal impact

HB 526 adopts the advance practice registered nurse compact and requiring criminal background checks for licensure. The fiscal impact of this legislation is due to the initial IT setup costs.

FISCAL ANALYSIS

Assumptions

Department of Labor and Industry

1. The configuration of a data system for the licensing board is required to facilitate the sharing of data with the Interstate Commission's data system to comply with the terms of the compact and will be an expense to the board. While the Interstate Commission is entitled to charge DLI for their programming costs, DLI would not have a basis to charge the commission for its data system programming costs.
2. The Technology Services Division (TSD) of DLI estimates that it will spend 109 hours to complete the technology implementation for the advance practice registered nurse compact. This estimate includes work to complete an analysis, design, develop, script and test. The licensing board will be billed at a rate of \$120 per hour for a total expense of \$13,080.
3. License applicants will bear the cost of providing a fingerprint and background check as part of the documentation for their license application. The administrative work to process the background checks can be covered by current resources within the department.

Department of Justice

4. The Division of Criminal Investigation (DCI) currently has staff in place to conduct background checks and provide fingerprinting services.
5. It is assumed that there will not be a large influx of APRNs requiring fingerprinting and background services and therefore the DCI does not anticipate the need to retain additional staff.
6. The DCI assumes that there will not be a large increase in revenues.
